Greer, Spartanburg County, South Carolina

Draft Hazardous Waste Management Permit

SCD 981 031 040

The South Carolina Department of Environmental Services (SCDES) has written a draft Hazardous Waste Management Permit for Safety-Kleen Systems, Inc. (Greer) located in Greer, South Carolina.

The draft permit has been written to comply with the South Carolina Hazardous Waste Management Regulations and the Federal Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments.

This Fact Sheet explains SCDES's hazardous waste permitting process and the conditions of the draft permit. SCDES welcomes any comments you may have concerning how this Fact Sheet can be improved.

I. Hazardous Waste Permitting Process

SCDES regulates hazardous waste activities at permitted facilities in South Carolina.

The permitting process enables SCDES to evaluate the ability of a facility to comply with state and federal regulations.

After a hazardous waste permit application is received and determined to be complete, SCDES writes a draft permit containing all conditions that the

facility must meet.

Interested citizens are given forty-five days to review and comment on the facility's permit application and the draft permit before SCDES makes a final permit decision.

Citizens may request a public hearing to learn more about the facility during the public comment period.

SCDES encourages all interested persons to participate in the permitting process.

II. Facility Description

Safety-Kleen Greer is an accumulation point for spent solvents and other waste materials generated by Safety-Kleen customers. All spent solvents and wastes are ultimately shipped offsite to a Safety-Kleen recycling facility, a contract reclaimer, or a permitted waste management facility.

The site consists of approximately 3 acres and is located northwest of the intersection of Highway 101 and Interstate 85 in Greer, South Carolina. The facility was built in 1985.

Hazardous waste, including spent parts cleaner (Petroleum Naphtha), dumpster sediment, tank bottom sediment, spent immersion cleaner, dry cleaning wastes (consisting of perchloroethylene (PCE), mineral spirits, and/or freon), paint booth filters, paint waste, gasoline (gas pump filters and gas engine filter), and liquid and solid contaminated debris are received by the facility.

III. Facility's Hazardous Waste Permit History

A RCRA Hazardous Waste Management Permit was issued to Safety-Kleen Greer on May 22, 2013. Safety-Kleen Greer will continue to operate under the conditions of the May 2013 permit until a renewal permit becomes effective.

Hazardous waste permits issued by SCDES are effective for a ten-year period.

IV. Draft Permit Requirements

There will be **no new hazardous waste activities at Safety-Kleen Greer** as a result of the draft permit.

The draft permit includes requirements based on any new regulations that have become effective since the facility's last permit was issued.

A brief outline of the draft permit conditions is provided in the attached table. These conditions include the following specific requirements:

- 1. The design and operations of permitted waste storage in tanks and containers.**
- 2. Identification and Corrective Action for Solid Waste Management Units (SWMUs).**

SWMUs are areas where contamination occurred prior to 1980.

Six (6) SWMUs have been identified at the Safety-Kleen Greer site.

- 3. Waste minimization and land disposal restrictions.**

V. Public Participation

The permit application and draft renewal permit are available for public review and comment from **July 24, 2026, through September 8, 2026.**

SCDES placed a Public Notice in *The State* newspaper and *The Herald Journal* newspaper on July 24, 2026, announcing the beginning of the public comment period.

Citizens may request a public hearing to learn more about the facility, the permit application and the draft permit during the public comment period.

Written comments and/or requests for a formal public hearing must be submitted

no later than September 8, 2026, and should be addressed to Mr. Kent Krieg at the following address:

SCDES
Bureau of Land and Waste Management
2600 Bull Street
Columbia, SC 29201
E-Mail: Kent.Krieg@des.sc.gov

The draft permit, permit application and other related information are available for review through **September 8, 2026**, at the SCDES Columbia Office listed above.

This Fact Sheet and the Public Notice may be reviewed on SCDES's Website at <https://des.sc.gov/PublicNotices>.

Anyone who would like to be placed on SCDES's mailing list to receive future hazardous waste Public Notices

concerning this facility should submit a written request to the attention of Ms. Norma West at the above SCDES address in Columbia or by e-mail at: Norma.West@des.sc.gov.

VI. Procedure for Reaching a Final Permit Decision

All written comments received by September 8, 2026, will be considered before a final permit decision is made.

Once SCDES makes a final permit decision, notification will be provided to:

- The facility;
- Each person who submitted written comments; and
- Anyone who has requested to receive notice of the final permit decision.

VII. Summary of Draft Permit Conditions

The draft renewal permit is divided into seven modules. Each module and a brief explanation of the permit conditions for that module are listed in the table below. The regulation that the condition(s) must comply with is also noted.

Module I	Standard Conditions	This section defines and contains standard administrative conditions that apply to all hazardous waste management facilities. (R.61-79.270.30)
Module II	General Facility Conditions	Conditions apply to all facilities that treat, store or dispose of hazardous waste. (R.61-79.264)
Module III	Storage In Containers	This section defines the requirements of operating and closing a Hazardous Waste Storage Facility. It contains general information along with schedules and required documents to be maintained by the facility. (R 61-79.264)

Module IV	Storage in Tanks	Conditions apply to the use and management of tanks for storage at the facility. It also contains general information regarding the design, operation, and maintenance of the storage area of the facility, along with schedules and required documents that must be maintained by the facility. <i>(R.61-79.264.190)</i>
Module V	Corrective Action for Solid Waste Management Units & Areas of Concern	This section requires the facility to implement corrective action measure, when necessary. <i>(R.61-79.264)</i> The objective of the corrective action program at a hazardous waste management facility is to evaluate the nature and extent of releases of hazardous waste and/or constituents and, if necessary, to put corrective measures in place that will protect human health and the environment.
Module VI	Waste Minimization	Conditions require that the facility has a program in place to reduce the volume and toxicity of hazardous waste generated and that the treatment, storage or disposal method minimizes present and future threat to human health and the environment. <i>These conditions are governed by Section 44-56-170(A) of the 1976 South Carolina Code of Laws, as amended.</i>
Module VII	Land Disposal Restrictions	Conditions ensure that restricted waste was not disposed in a land-based unit or otherwise managed unless certain requirements are met. <i>(R.61-79.268)</i>
